

Day 8: The AI Workflow Shift

Morning Post (Educational)

LinkedIn Post

Applying for jobs without an AI workflow is like writing a book on a typewriter. It is slow, inefficient, and puts you at a disadvantage.

Many job seekers spend hours manually matching keywords and proofreading every application. Meanwhile, their peers are using modern tools to double their efficiency and target roles accurately.

AI is not replacing job seekers; it is separating those who use it strategically from those who do not. The goal is to automate the repetitive tasks so you can focus on interview prep and networking.

A modern AI workflow has four simple steps: (1) Extract core requirements from the job description, (2) Compare your master CV to find gaps, (3) Draft direct, metric-driven achievements, and (4) Format for ATS compliance.

I've reviewed dozens of CVs, and the candidates who use a structured AI workflow submit higher-quality applications in a fraction of the time.

Stop doing manual labor that a machine can assist with. Learn the correct system.

If this sounds familiar, I'll be teaching the complete workflow inside my upcoming AI Job Seeker Workshop. Seats are limited.

Handwritten Visual

Handwritten Visual Text

"Automate the process. Personalize the value."

AI Visual Prompt

Minimalist overhead photo of clean white paper. The sentence is handwritten neatly in thick black marker. Natural lighting. No hands. No notebook. No decorations. High contrast. Mobile friendly. Lots of white space. Instagram and LinkedIn optimized.

Applying for jobs without an AI workflow is like using a typewriter. It is slow and puts you at a disadvantage.

AI is separating job seekers who use it strategically from those who don't. Automate repetitive tasks so you can focus on interview prep. I've reviewed dozens of CVs, and AI-optimized ones perform better.

Learn the system at the AI Job Seeker Workshop. KES 1,000 Early Bird. Workshop registration link: <https://duncanmakoyo.com/#!/workshop>

X Thread

1/ Applying for jobs without an AI workflow is like writing a book on a typewriter. Here is why you need to modernize your process. ■

2/ Job seekers waste hours copy-pasting and proofreading. It restricts how many targeted applications they can submit.

3/ Strategic AI use isn't about letting a bot write your resume. It's about workflow efficiency.

4/ A proper workflow: Extract job requirements, match experiences, and edit bullet points for impact.

5/ I've reviewed dozens of CVs, and structured AI resumes stand out because they are highly targeted.

6/ Stop doing manual work that can be streamlined in minutes.

7/ I'll show the exact prompts in my upcoming workshop. Workshop registration link: <https://duncanmakoyo.com/#!/workshop>

Afternoon Post (Story / Case Study)

LinkedIn Post

He was skeptical about using AI for his job search. Then he saw his peer get hired.

He believed AI was just a gimmick for writing basic essays. He kept writing and formatting his CV manually, applying to only two jobs a week because the process was so draining.

Meanwhile, his peer was using a structured AI workflow to target and submit five tailored applications a week. He wasn't spamming; he was just faster.

We helped the skeptic build a simple custom prompt workflow. We fed ChatGPT his actual experience and showed him how to extract job requirements and align them without losing his voice.

One of my clients got hired this week after adopting this exact AI-assisted application workflow.

The difference in job search success is rarely about qualifications; it is about workflow efficiency.

If you're serious about improving your applications, I'll show the exact system during the workshop.

Evening Post (Workshop Invitation)

LinkedIn Post

There are only 20 seats available for my upcoming AI Job Seeker Workshop.

Many job seekers want to join but delay registration, missing out on the Early Bird pricing.

Early Bird tickets are KES 1,000, but they will increase to the regular price of KES 1,500 soon.

In this 2-hour session on Google Meet, you will get the exact prompts and templates to tailor your CV in minutes.

I've worked with over 10 professionals to help them build ATS-friendly resumes and scale their job search.

Secure your seat today before the price increases and the KES 1,000 offer ends.
